

Tomasz Kobus

DEVOPS & MLOPS ENGINEER

About

Engineer at the intersection of DevOps and MLOps. I run a production infrastructure of 30+ Docker containers 24/7 with GPU passthrough. Creator of CellForge — an open-source notebook IDE in Rust. InkWatchy contributor.

Languages

Polish Native
English C1 Cambridge, 2022

Core Stack

Docker / Compose
Linux (Debian/Arch)
Cloudflare Tunnels
NVIDIA / CUDA GitHub Actions
SSH Hardening Python / Bash
Git

Other

Rust TypeScript / React
PyTorch C++ / ESP32 Nginx
MariaDB / Postgres

WORK EXPERIENCE

since 07.2026

Logistics & IT Specialist

PROBUS SP. Z O.O.

📍 ŻĘDOWICE

- Planning and coordinating international passenger transport on Poland–Germany routes
- General IT support — day-to-day technical assistance across the company

2025 – 2026

Programming Instructor

GIGANCI PROGRAMOWANIA SP. Z O.O.

📍 CZĘSTOCHOWA

- Taught programming classes for kids aged 9-12 (Scratch, Python, Lua, Minecraft Education)
- Managed a fleet of educational workstations (S0-S19, trainer/student split) — setup, patching, Veyon classroom monitoring
- Deployed and maintained educational Minecraft servers on self-hosted infrastructure
- *Stack: Python, Docker, Linux, Veyon*

07.2024

IT Intern

EUROBOX POLSKA SP. Z O.O.

📍 LUBLINIEC

- Helpdesk and hardware/software diagnostics, automation of administrative tasks (application autostart), workstation setup
- *Stack: Python, Bash, Windows, Linux*

PROJECTS

2023 – present

Self-hosted server infrastructure

PERSONAL PROJECT

📍 PRODUCTION 24/7 · 99.92% UPTIME

- 30+ containerized services on a Xeon E5-2680v4 + Quadro RTX 4000 + 2 TB storage (~\$500+/mo AWS equivalent)
- Docker Compose with YAML anchors, isolated networks and health checks; zero-trust exposure via Cloudflare Tunnels
- Self-hosted cloud (Nextcloud, Home Assistant, Jellyfin + *arr, Next.js + Postgres) + monitoring (Uptime Kuma, Watchtower, custom Flask power-monitor)
- SSH hardening (fail2ban, key-only auth), btrfs snapshots; *Stack: Docker Compose, Cloudflare Tunnels, NVIDIA Container Toolkit, Pelican, Nginx*

2025 – present

CellForge — Notebook IDE in Rust

GITHUB.COM/SUBBOK/CELLFORGE

📍 OPEN SOURCE

- JupyterLab alternative in Rust + React — native implementation of the Jupyter messaging protocol
- Backend: 7 Rust crates (axum + tokio + zeromq-rs), 186+ tests; real-time collaboration via Yjs CRDT (shared editing, remote cursors, per-notebook kernel sharing)
- PDF export via Typst (~50× faster than LaTeX), reactive execution with an AST dependency analyzer, hub mode with JWT auth and a plugin system
- CI/CD: GitHub Actions + GHCR, pre-built image with Python 3.12 + PyTorch + CUDA; *Stack: Rust, React 19, TypeScript, Yjs CRDT, ZeroMQ, Typst, CUDA*

2025 – 2026

LLM Benchmark Pipeline — Master's Thesis

GITHUB.COM/SUBBOK/LLM-BENCHMARK-THESIS

📍 DEFENDED 2026

- Multi-dimensional evaluation of 10 LLMs (6 commercial + 4 local) across 80 tasks — 800 model calls
- 4 metrics: Pass@1 (unit tests), CodeBLEU (AST + dataflow), BERTScore (RoBERTa-large), G-Eval 1-100 (LLM-as-a-judge)
- Models: Claude Opus 4.6, GPT-5.2, Gemini 3.1 Pro, Grok 4, DeepSeek V3.2, KIMI K2.5 + local (Qwen2.5, Gemma3, Mistral-Nemo, Llama3.2 via Ollama)
- GPU-accelerated evaluation (CUDA/PyTorch) with CPU fallback, sandboxed code execution, master Bash pipeline with conda env management; *Stack: Python, Bash, PyTorch, CUDA, Ollama, OpenRouter API, HuggingFace, tree-sitter*

2024 – present

InkWatchy — open source contributor

GITHUB.COM/SZBYET/INKWATCHY

📍 OPEN SOURCE

- Complete i18n system (EN/PL/DE/SK) for an ESP32 e-ink smartwatch firmware — 116+ keys with compile-time validation, zero runtime overhead
- Rewrote the calendar module (multi-URL import, recurring events, timezones), QuickAlarm system; *Stack: C++, Arduino, ESP32*

EDUCATION

2025 – 2026

Computer Science — Artificial Intelligence & Data Science (M.Sc. Eng.)

CZĘSTOCHOWA UNIVERSITY OF TECHNOLOGY

📍 CZĘSTOCHOWA

Thesis: *“Comparative evaluation of selected large language models on text and code generation tasks”* (defended 2026). Coursework: Computer Vision, Recommender Systems, NLP, Deep Learning, AI Computational Architectures.

2020 – 2025

Computer Science — Computer Networks (B.Eng.)

CZĘSTOCHOWA UNIVERSITY OF TECHNOLOGY

📍 CZĘSTOCHOWA

Thesis: *“Comparison of 3D printer firmware — Marlin vs Klipper”*. Coursework: Computer System Security, Datacenter Infrastructure Management, Wireless Networks, Network OS Administration, Embedded Systems.
